

# VIRTUE REALITY & CYHOP

## **More Than a Corporation. A Shared Mission.**

At Virtue Reality, we believe technology alone does not change the world.

**Technology, culture, and community change the world together.**

**Virtue Reality** is the company building the technology.

**CYHOP** is the movement inspiring the people.

Virtue Reality is the body. CYHOP is the soul.

Together, they represent a vision for a safer, stronger, and more empowering digital future.

---

## **A Rare Alignment of Purpose and Opportunity**

It is rare when doing the right thing is also great business.

We believe this is one of those moments.

Across America and around the world, there is growing demand for protection in cyberspace. Parents want their children to be safe online. Gamers want healthier communities. Creators want stronger safeguards. Users want technology they can trust.

The demand is real.

The demand is global.

We believe one of the greatest unmet demands of the digital age is **trust in cyberspace**.

We are answering the call.

---

## **Our Investors. Our Partners.**

We seek investors who care to support world-changing technologies.

We seek partners who share our mission, respect our values, and recognize the opportunity to build a company that generates both extraordinary value and outstanding returns.
